

Fingerprint Scanning in RIMAS NT/P Entry Programs

Several of Shared Logic's entry programs now provide the ability to scan and store fingerprints, satisfying growing State and local requirements that fingerprints be stored for the seller as material is received. Shared Logic has interfaced its RIMAS NT/P Receiver Entry program with the award-winning BioCert fingerprint scanners. Fingerprints can be scanned and reviewed in seconds at a high resolution of 500 dpi. Additional features of the fingerprint scanner include:

- * USB connection
- * Removable weighted stand
- * Compact, lightweight and portable
- * High-performance, maintenance-free optical sensor
- * Resistance to scratches, impact, and electrostatic shock
- * Fast and accurate verification
- * Latent print image removal (does not accept prints left behind)
- * Encryption of fingerprint templates (cannot be used to reconstruct fingerprint images)

The fingerprint scanners and interface are available through the Shared Logic Group. Contact Shared Logic to learn more about the fingerprint scan program, the scanner, and its uses within RIMAS NT/P for Windows.

The fingerprint scanner is opened from within the Receiving Entry program and appears on the same screen as the ID Scanner feature. The seller's fingerprint is captured and displayed next to their ID and identification information. Fingerprints are stored in the RIMAS NT/P database with the seller's record, for later viewing.
