

Shared Logic

Where New Technology and Preservation come together.

You may think you've seen everything that recycling software has to offer.

You might have already looked at **RIMAS NT/P**.

Look again.

Shared Logic
presents

RIMAS NT/P Version 2
Constant updates, Consistent quality.

Recycling Industry Management & Accounting System

RIMAS NT/P

RIMAS NT/P is the most advanced windows-based recycling software available.
That's not new.

RIMAS NT/P Version 2 combines the outstanding features found in Version 1, the exceptional service by which **Shared Logic** earned its reputation, and the superior level of quality found in all **Shared Logic** products with new features including the Reverse/Reject program, the ability to automatically e-mail all reports and forms from within the system, multiple currency capabilities, and optionally integrating e-Doc Executive, **Shared Logic's** document storage and retrieval system.
That is new.

Not only is **RIMAS NT/P Version 2** equipped with more features than ever before, it is constantly being updated. As a **RIMAS NT/P** user you are given access to each and every program change, meaning each week **Shared Logic** will deliver new features, new capabilities, new ways to solve everyday business problems.

You may think you've seen all that **RIMAS NT/P** has to offer.

Look again.
