Trader Inquiry

Dynamic Access to Company Data

Shared Logic

Shared Logic offers **Trader Inquiry**, a business solution designed to display company data using a dynamic drill-down method.

Trader Inquiry provides authorized personnel with secure, read-only access to company data and allows the user to view summarized or detailed information, as desired.

Users of RIMAS NT/P, **Shared Logic's** unique management and accounting system, benefit from immediate access to data generated on demand, providing accurate information for confident and profitable decision-making.

Trader Inquiry features:

Basic Features
* Create and streamline queries using selected combinations of criteria to access the desired data.
* Use drill-down technology to research and spot-check records in a general-to-specific format.
* View query information and the corresponding grids side-by-side.
* Generate secure, read-only data for authorized users.

Margin Analysis
* Estimate account profitability based on time frame and type of material.
* Optional allocation of standard costs to the margin computation.

Reports
* Provide authorized users with instant, read-only access to company reports generated in RIMAS NT/P.
* View, catalog, or search for reports saved as Adobe, Excel, Word, Crystal Reports, and Text files.
* Create and preview customized reports using ReportBuilder.

Dispatch
* View Dispatch information including Service Locations, Recurring Trips, all Open Call and Trip information, and current and historical Equipment Locations

Bids
* Create a bid for a new account or multiple bids for the same account and e-mail or FAX them directly to a customer.

Integrated Document Retrieval
* Integrate e-Doc Executive for seamless document retrieval.

Accounts Master
* View account information including credit limits, last billing, payment dates, billing and payment auditing, last time visited, and next scheduled visit.

Pricing
* View account and commodity information, effective and expiration dates for prices, and market and formula information from Purchase/Sale Pricing.
* Compare current and previous year average prices for commodities by account and yard.
* Generate full-color graphs to illustrate pricing information

Purchase and Sale Detail
* View shipment information by account including freight information, contracts, and commodity detail.
* View transaction detail including commodities, weights, pricing, and status.

Commodity Totals/Information
* View summarized commodity information including Commodity Totals, Loads, and Average Price.
* View weights: Receiver/Shipper, Vendor/Customer, or Settlement.
* View on-hand inventory by location, inventory valuations, and tagged inventory status.

Brokerage
* View purchase, sale, and freight information for a Brokerage shipment.

Memos
* View or create memos for Account Information and Purchase/Sale Contracts.

A/P and A/R Aging
* View aged information regarding open transactions and account status including payment history and related information.
