RIMAS NT/P Feature Spotlight...

Scale Receiving Account Lookup Filter

The *Account* field on the top of the Scale Receiving entry programs is unique in that the lookup contains a filter for narrowing the list of vendors based on entered criteria.

The Filter Button opens a second window for narrowing the choices in list.

| ACCOUNT | NAMEKEY | GRP | CITY | STATE |
|---------|-----------------|-----|---------------|-------|
| 1235 | BBB | | Carson | MI |
| 1236 | CCC | | | |
| 1245 | ABC 33 | I | PASADENA | MD |
| 3052 | BGE | A | WASHINGTON | MD |
| A | AAA | I | Pasaic | NJ |
| AC0001 | ACME COMPANY | RET | MAUMEE | OH |
| ACE9100 | ACEMCO | FE | | |
| B | | F | | |
| BOB | Bob's Trucking | F | Toledo | OH |
| BOYER | BOYER SCRAP CO. | | New Hampshire | MA |
| CAN1 | CANADA 1 | I | Ontario | CA |

When the *Filter* button is clicked a second screen opens that allows the user to input criteria for limiting the number of returned vendors in the lookup list. Refer to the image below. The Vendor list can be limited by any of the criteria in the list, including those that do not appear in the lookup window.

Spotlight cont...

Selecting a criteria by which to limit and entering a value in the *Field Value* box will limit the returned records in the Lookup window. Values can be entered By Value or By Range, and multiple values can be entered when separated by “or”. For example, in the image above, the user could search for values of F and I by typing in “F or I”. Records with either value would be returned in the list.

Once a filter has been setup, right click on the Account field and select *Save Filter* to save it for later use. Whenever a new record is added in a Scale Entry program, the most recently used filter will be applied. The filter can be changed by right-clicking on the Account field, and selecting *Load Filter*.

Scale Retail Entry stores a separate set of filter settings than the other three Scale Entry programs. Full Entry, Short Form Entry, and Touch Screen Entry all use the same stored filter settings. There is no limit to the number of filters that can be stored.

Driver’s License Scanning Coming Soon

The following feature will soon be available within the RIMAS NT/P program: Driver’s License Scanning and Optical Character Recognition for Scale Entry!

A scanner provided by Card Scanning Solutions allows a Driver’s License to be scanned and the Name, Address, City, State, Zip Code, and Vendor fields to be “read” and automatically generated in any RIMAS NT/P Scale Entry program.

Using the Driver’s License Scanner eliminates time spent manually entering peddler information, ensures accurate entry, and provides a means to quickly and efficiently retain copies of peddler identification for re-use each time that peddler is entered.

Contact Shared Logic to request more information regarding purchasing this scanner and its time-saving interface into Scale Receiving.
