RIMAS NT/P Feature Spotlight...

Scale Receiving Drivers License Scanning

Drivers License scanning is now available within the RIMAS NT/P Scale Receiving module. Any of the four Scale Entry programs can be used with a specialized scanner, available only through Shared Logic, to scan and store a picture ID for each Name used within an Account.

The ID Scan program is opened using the *ID* button found next to the *Name* field in a Scale Entry program.

When a Drivers License is scanned in, information about the peddler is 'read' using Optical Character Recognition (OCR) and entered automatically into the form. The image and information can then be placed into the *Name*, *Address*, *C/S/Z*, and *Vendor ID* or *Address 2* fields on the Scale ticket. Below is the ID Scan screen, as seen in RIMAS NT/P. All of the informational fields shown are captured using OCR and can be manually changed if necessary.

Spotlight cont...

Drivers License records are stored in a table within the RIMAS NT/P database and can be recalled for use over and over, eliminating the need to enter information multiple times for the same seller. The Search tab allows records to be filtered using Partial Match Anywhere. Once located, a record can be selected from the list and its information will appear on the ID Scan screen and be available for entry into the Scale Entry program.

Full Name	Address	City	ST ZIP
Joe Schmoe	6904 Spring Valley Drive	Holland	OH 431

There is no limit to the number of IDs that can be stored per account, as long as each has its own unique Full Name. Contact Shared Logic with any questions regarding the purchase of hardware or the license and use of the ID Scan program.

Did you know?

The shortcut buttons on the Main Menu of RIMAS NT/P can be customized to reflect the programs most widely used on each workstation. While on the Main Menu, click the F2 button to open the Station Defaults. Up to eight buttons may be used, and each can point to a particular program or an entire module. Select the program each button is to open from the dropdown list. The letters used to represent each button can also be customized on each workstation by typing in the Letter fields. More information regarding the function and use of the Main Menu can be found in the RIMAS NT/P User Manual [Chapter 1: Installation and Support](#).
