RIMAS NT/P Feature Spotlight...

RIMAS MMC: Maintenance and Management Costing Program

A new product will soon be available to RIMAS NT/P customers. The Maintenance Management and Costing program, also known as RIMAS MMC, is a separate executable containing four modules that integrate back into the main RIMAS NT/P system. The four MMC modules are: Parts Inventory, Maintenance Purchase Orders, Preventative Maintenance and Work Orders. These modules work with the RIMAS NT/P Accounts Payable and General Ledger modules to comprise an equipment maintenance system separate but integrated with the existing RIMAS NT/P system.

Parts Inventory includes the ability to print bar code tags for spare parts, and enter a physical count using either the MMC entry program or a handheld device. Parts codes are created and maintained in the MMC program. Users can also print Parts, Pre-Count, and Posting Registers.

The Purchase Order module allows users to create Purchase Orders, print Order forms, and enter Purchase Invoices against an order. Purchase Invoices are then posted against the RIMAS NT/P Accounts Payable module.

Preventative Maintenance includes programs that schedule preventative maintenance procedures for equipment, allow entries of equipment usage and generate work orders. Registers for equipment maintenance forecasts, overdue maintenance procedures, and equipment usage can be printed.

Works order entries are created in the Work Order module and the corresponding forms can be printed. Work order parts and labor are entered in their own entry program. Parts can be issued and posted for inventory purposes.

Contact SLG for more information on the licensing and use of RIMAS MMC with the existing RIMAS NT/P modules.

Name Contains Filter

Several Scale Receiving and Purchase History programs now contain a *Name Contains* filter. The Name being searched for is the payee name associated with the Bill Code on the Material Receiving Entry and Scale Receiving Entry screens.

The programs that use the *Name Contains* filter are Scale Receiving Receiver Register, Receipts on Hold Register, Receipts by Account Register (example below), Remitted Receivers Register, and Remit Deferred Receivers. Purchase History also uses this filters on the Purchase History Register.

The *And* and *Or* radio buttons are used to determine if the contents of the two *Name Contains* fields are searched for together or are mutually exclusive

Larry Smith and Perry Jacobs to be at ISRI Conference in Las Vegas

Larry Smith and Perry Jacobs will be in attendance the ISRI conference in Las Vegas on April 3-7. Larry and Perry will be available for product demonstrations and inquiries at Booth #440. Additional printed information regarding any of Shared Logic's products and numerous features (i.e. Touch Screen Scale Entry and Camera Surveillance, the Maintenance Management and Costing program and Purchase Order Management module) will also be available. We welcome you to stop by and meet Larry and Perry and pick up your free demonstration copy of e-Doc Executive, Shared Logic's electronic document storage and retrieval system!
